SUMMARY

MCA Data Science student with a BCA degree and hands-on experience in AI/ML and Full-Stack Java development. Built practical AI applications in financial assistance, Natural Language Processing, fact-checking, and Computer Vision. Strong foundation in Python, Java, MySQL, machine learning, and problem solving, with an interest in building useful data-driven applications.

TECHNICALSKILLS

Programming Languages: Python, Java
Data Science & AI: Data Science, Machine Learning, Natural Language Processing (NLP), Computer Vision, Generative AI
Libraries & Frameworks: Pandas, NumPy, OpenCV, DeepFace, TensorFlow, Keras, React, Node.js, Express.js
Databases & Cloud: MySQL, Firebase Firestore, Firebase Cloud Functions
Web & APIs: HTML, CSS, Java Web Development, REST APIs, WhatsApp Business Cloud API, Google Maps Places API, Distance Matrix API
Tools & Platforms: Jupyter Notebook, VS Code, Git, GitHub

INTERNSHIPS&TRAINING

AI/ML Intern — InternPe *15 Jul 2024 – 11 Aug 2024*
- Completed an internship in the AI/ML domain with practical exposure to artificial intelligence and machine learning concepts.
- Applied technical knowledge through AI/ML-oriented learning and project activities in a professional environment.

Full Stack Java Web Application Development Intern — Ideonix Solutions *20 Dec 2024 – 18 Jan 2025*
- Completed a 90-hour internship focused on Full Stack Java Web Application Development under the technical team.
- Gained practical exposure to Java-based web application development and professional software development workflows.

PROJECTS

Mitra NammaEco — AI Financial Assistant for Informal Workers
Node.js | Express.js | Firebase | Google Gemini | React | WhatsApp Business Cloud API
- Built a multilingual, voice-first WhatsApp financial assistant for informal workers in Bengaluru for financial tracking and data-driven business decisions.
- Integrated Gemini AI to extract income and expenses from conversational text or voice notes and store structured records in Firestore.
- Implemented Kannada, Hindi, Tamil, Telugu, and English support, along with government-scheme matching based on occupation, age, and location.
- Integrated Google Maps Places and Distance Matrix APIs to calculate wholesale-market distances, auto fares, and break-even quantities.

Truth-Lens — AI-Powered Fact-Checking Engine
Python | NLP | AI | Web Data
- Built an AI-powered fact-checking engine that validates textual claims against real-time web data, accepting a news article URL or raw text.
- Designed a pipeline to automatically extract verifiable claims and search for corroborating or contradicting evidence.
- Generated detailed accuracy reports with source citations and confidence scores to help users assess news reliability.
- Applied Data Science and NLP techniques to process unstructured text and evaluate claim credibility.

AI-Based Face Detection System for Examinations
Python | OpenCV | DeepFace | TensorFlow | Keras
- Created a real-time face recognition system using DeepFace and OpenCV to verify exam candidates and help prevent impersonation during online assessments.
- Used TensorFlow and Keras models for facial feature encoding and implemented automated alerts when an unrecognized face was detected.
- Designed the system to support continuous candidate identity monitoring during online examinations.

EDUCATION

Master of Computer Applications (MCA) — Data Science *2025 – 2027*
Chanakya University, Devanahalli, Bengaluru, Karnataka | **CGPA: 7.77/10**

Bachelor of Computer Applications (BCA) *2022 – 2025*
Christ College, Mysore — University of Mysore, Karnataka | **CGPA: 7.2/10**

ADDITIONALINFORMATION

Languages: English, Kannada, Telugu **Core Strengths:** Analytical Thinking, Problem Solving, Critical Thinking, Effective Communication, Teamwork, Fast Learning, Time Management
